LATEX for Beginners

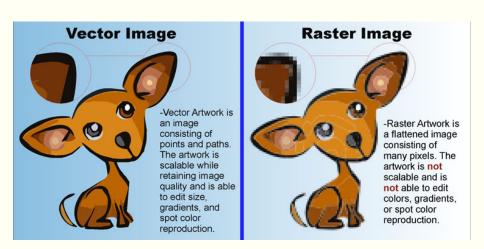

Krishna Kumar

Outline

- Graphics
 - Raster v Vector graphics
 - Better quality figures
 - Including figures
- 2 Tables
 - Formatting tricks
- Referencing using bibLATEX
 - BibleTEX
- PhD Thesis Template

Vector graphics vs. Raster images

Use inkscape to generate vector graphics

Colour blindness

- Making graphs with colour-blind viewers in mind Charlotte Houldcroft https://kks32.github.io/latex/articles/colour-blindness/
- Use GNUPlot to generate vector graphics of your plots. Make sure the plots have different line styles so it works well on a black and white print.

Figures

- LATEX can be easily extended using a package to typeset images.
- To use graphics in your LATEXdocument use \usepackage{graphicx}
- Always use relative scaling to specify the width of the figure, i.e.,
 [width = 0.75\textwidth]
- Never ever use absolute values to scale your images!
- Set either the width or the height of the image. Or use scale

Figures

- For captioning a figure, you can use \usepackage{caption}
- tweak the location, label, separator: [labelsep=space, tableposition=top]{caption}
- I prefer to centre the figure. To do that use \centering
- You can use ~\cref{fig:minion} to cross reference the figure. Requires package cleveref

Figure: Dave the Minion from Despicable Me!

\begin[option]{figure}

Parameter	Position
h	Place the float here, i.e., approximately at the same point it occurs in the source text (however, not exactly at the spot)
t	Position at the top of the page.
b	Position at the bottom of the page.
p	Put on a special page for floats only.
!	Override internal parameters LaTeX uses for determining "good" float positions.
Н	Places the float at precisely the location in the LaTeX code. Requires the float package. This is somewhat equivalent to h!

Subcaption

I can cite Wall-E (see fig. 2b) and Minions in despicable me (fig. 2c). Figure 2 lets me cite the whole figure.

```
\begin{figure}
 \centering
 \begin{subfigure}[b]{0.3\textwidth}
    \includegraphics[width=\textwidth]
                             {figs/TomandJerry}
    \caption{Tom and Jerry}
    \label{fig:TomJerry}
 \end{subfigure}
 \begin{subfigure}[b]{0.3\textwidth}
    \includegraphics[width=\textwidth]{figs/WallE}
    \caption{Wall-E}
                                                          (a) Tom and
    \label{fig:WallE}
                                                                     (b) Wall-E
                                                                                (c) Minions
 \end{subfigure}
 \begin{subfigure}[b]{0.3\textwidth}
    \includegraphics[width=\textwidth]{figs/minion}
                                                               Figure: Best Animations
    \caption{Minions}
    \label{fig:Minnion}
 \end{subfigure}
 \caption{Best Animations}
 \label{fig:animations}
\end{figure}
```

Exercise 6: Pictures

Click to open this exercise in Overleaf

- In writeLATEXcreate a new folder figs and move your figures in to figs folder.
- Format the King's college picture. Change it's location: (top, bottom, here, new page) and rescale the figure.
- Arrange Tom, WallE and Dave inside a single figure environment vertically.
- Cross-reference the figures (using cleveref).
- Create a list of figures. Use \listoffigures.

Outline

- Graphics
 - Raster v Vector graphics
 - Better quality figures
 - Including figures
- 2 Tables
 - Formatting tricks
- 3 Referencing using bibLATEX
 - BibleTEX
- PhD Thesis Template

Tables

- Tables in LATEX take some getting used to.
- The argument specifies column alignment left, center, right.

```
\begin{tabular}{lcr}
Item & Qtv & Unit \$ \\
                                                   Item
                                                            Qty
                                                                   Unit $
                                                   Widget
Widget & 1 & 199.99 \\
                                                                  199.99
Gadget & 2 & 399.99 \\
                                                   Gadget
                                                                  399 99
Cable & 3 & 19.99
                      11
                                                   Cable
                                                                  19.99
\end{tabular}
```

 Don't use vertical lines, it's ugly. Use \begin{booktabs} to create horizontal lines. Never use \hline

```
\begin{table}[h]
                                                             Table: Cost
\caption{Cost}
\begin{tabular}{lrr} \toprule
Item
      & Qty & Unit \$ \\ \midrule
Widget & 1
            & 199.99 \\
                                                                       Unit $
                                                       Item
                                                                Qtv
Gadget & 2 & 399.99 \\
                                                                       199.99
                                                       Widget
Cable & 3 & 19.99 \\ \bottomrule
                                                       Gadget
                                                                       399.99
\end{tabular}
                                                       Cable
                                                                       19.99
\label{t:cost}
\end{table}
```

• Use an ampersand & to separate columns and a double backslash \\
to start a new row (like in the align* environment that we saw in part 1).

4日月4日月4日月4日

Table Environment

Option	Description
1	left-justified column
С	centered column
r	right-justified column
$p{\{\text{'width'}\}}$	paragraph column with text vertically aligned at the top
$m\{'width'\}$	paragraph column with text vertically aligned in the middle
$b{\{\text{`width'}\}}$	paragraph column with text vertically aligned at the bottom
\&	column separator
\\\cmidrule{i-j}	start new row (additional space may be specified partial horizontal line beginning in column i and ending in column j

Exercise 7: Tables

Click to open this exercise in **Overleaf**

- Use tabularx package for tables with paragraph text.
- Never use \hline or \cline, use \toprule, \midrule, \bottomrule and \cmidrule(i-j)
- Visual table editor: https://www.tablesgenerator.com/

Click to open my solution

A badly formatted table

```
\begin{tabular}{|1|c|c|c|}
\hline
& \multicolumn{2}{c}{Species I} &
        \multicolumn{2}{c|}{Species II} \\
\hline
DM & mean & SD & mean & SD \\
\hline
\hline
I1MD & 6.23 & 0.91 & 5.2 & 0.7 \\
\hline
T1LL & 7.48 & 0.56 & 8.7 & 0.71 \\
\hline
I2MD & 3.99 & 0.63 & 4.22 & 0.54 \\
\hline
I2LL & 6.81 & 0.02 & 6.66 & 0.01 \\
\hline
CMD & 13.47 & 0.09 & 10.55 & 0.05 \\
\hline
CBL & 11.88 & 0.05 & 13.11 & 0.04\\
\hline
\end{tabular}
```

	Species I		Species II	
DM	mean	SD	mean	SD
I1MD	6.23	0.91	5.2	0.7
I1LL	7.48	0.56	8.7	0.71
I2MD	3.99	0.63	4.22	0.54
I2LL	6.81	0.02	6.66	0.01
CMD	13.47	0.09	10.55	0.05
CBL	11.88	0.05	13.11	0.04

A nice looking table

```
\begin{tabular}{l c c c c}
\hline
\multirow{2}{*}{DM}
 & \multicolumn{2}{c}{Species I}
 & \multicolumn{2}{c}{Species II} \\
\cline{2-5}
  & mean & SD & mean & SD \\
\hline
I1MD & 6.23 & 0.91 & 5.2 & 0.7 \\
T1LL & 7.48 & 0.56 & 8.7 & 0.71 \\
I2MD & 3.99 & 0.63 & 4.22 & 0.54 \\
I2LL & 6.81 & 0.02 & 6.66 & 0.01 \\
CMD & 13.47 & 0.09 & 10.55 & 0.05 \\
CBL & 11.88 & 0.05 & 13.11 & 0.04\\
\hline
\end{tabular}
```

DM	Species I		Species II	
	mean	SD	mean	SD
I1MD	6.23	0.91	5.2	0.7
I1LL	7.48	0.56	8.7	0.71
I2MD	3.99	0.63	4.22	0.54
I2LL	6.81	0.02	6.66	0.01
CMD	13.47	0.09	10.55	0.05
CBL	11.88	0.05	13.11	0.04

An even nicer looking table

```
\begin{tabular}{1 c c c c}
\toprule
\multirow{2}{*}{DM}
        & \multicolumn{2}{c}{Species I}
        & \multicolumn{2}{c}{Species II} \\
\cmidrule{2-5}
  & mean & SD & mean & SD \\
\midrule
I1MD & 6.23 & 0.91 & 5.2 & 0.7 \\
T1LL & 7.48 & 0.56 & 8.7 & 0.71 \\
I2MD & 3.99 & 0.63 & 4.22 & 0.54 \\
I2LL & 6.81 & 0.02 & 6.66 & 0.01 \\
CMD & 13.47 & 0.09 & 10.55 & 0.05 \\
CBI, & 11.88 & 0.05 & 13.11 & 0.04\\
\bottomrule
\end{tabular}
```

DM	Species I		Species II	
	mean	SD	mean	SD
I1MD	6.23	0.91	5.2	0.7
I1LL	7.48	0.56	8.7	0.71
I2MD	3.99	0.63	4.22	0.54
I2LL	6.81	0.02	6.66	0.01
CMD	13.47	0.09	10.55	0.05
CBL	11.88	0.05	13.11	0.04

Formatting tables

- Use tabulary package for tables with paragraph text.
- Never use vertical lines in your table. It looks ugly!
- Use booktabs package for rules instead of lines.
- Never use \hline or \cline, use \toprule, \midrule, \bottomrule and \cmidrule(i-j).
- Use \centering to center your tables, do NOT use \begin{center} and \end{center} as it adds additional white space

Outline

- Graphics
 - Raster v Vector graphics
 - Better quality figures
 - Including figures
- 2 Tables
 - Formatting tricks
- Referencing using bibLATEX
 - BibleTEX
- PhD Thesis Template

BibLATEX 1

• Put your references in a .bib file in 'biblatex' database format:

```
@Article{Jacobson1999Towards.
  author = {Van Jacobson}.
 title = {Towards the Analysis of Massive Multiplayer Online
           Role-Playing Games},
  journal = {Journal of Ubiquitous Information},
 Month = jun,
 Year = 1999.
 Volume = 6.
 Pages = \{75--83\}
@InProceedings{Brooks1997Methodology,
  author = {Fredrick P. Brooks and John Kubiatowicz and
            Christos Papadimitriou},
 title = {A Methodology for the Study of the
           Location-Identity Split}.
 booktitle = {Proceedings of OOPSLA},
 Month = jun,
 Year = 1997
```

• Most reference managers can export to bibtex format.

BibLATEX 2

 Each entry in the .bib file has a key that you can use to reference it in the document. For example, Jacobson1999Towards is the key for this article:

```
@Article{Jacobson1999Towards,
  author = {Van Jacobson},
  ...
}
```

- It's a good idea to use a key based on the name, year and title.
- LATEX can automatically format your in-text citations and generate a list of references; it knows most standard styles, and you can design your own.

BibLATEX 3

- Use the biblatex package with \textciteand \autocite for textual and parenthetical citations, respectively.
- Add references using \printbibliography at the end, and specify a \bibliographystyle.

```
\documentclass{article}
\usepackage[style=authoryear-ibid]{biblatex}
%Import the bibliography file
\addbibresource{references.bib}
\begin{document}
\textcite{Brooks1997Methodology}
show that \ldots. Clearly,
all odd numbers are prime
\autocite{Jacobson1999Towards}.
\printbibliographv
\end{document}
```

Brooks, Kubiatowicz, and Papadimitriou (1997) show that . . . Clearly, odd numbers are prime (Jacobson 1999).
